

HOW-TO GUIDE · MOBILE

Add MIRX to MetaMask (mobile)

Last updated: 2026-09-18

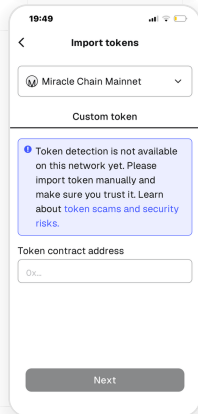

The MIRX token doesn't always appear automatically in MetaMask. This guide shows how to add it manually so you can see your balance — step by step, on mobile.

This guide shows the steps on mobile. Menus, button names and layout may vary slightly between iPhone (iOS) and Android, and between app versions — the principles are still the same.

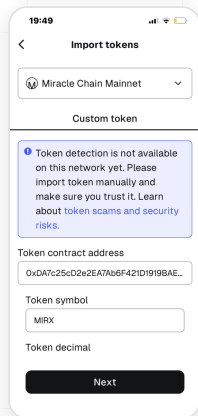

1 Open the network selector

In MetaMask, go to **Networks** and select the **Miracle Chain** network under the **Custom** tab.

2 Add a new token

Tap the **+** icon at the top right of the token list to add a new token.

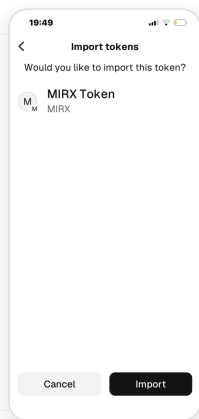

3 Paste the MIRX address

Under **"Token contract address"**, paste the MIRX token's contract address below. The token symbol **MIRX** fills in automatically.

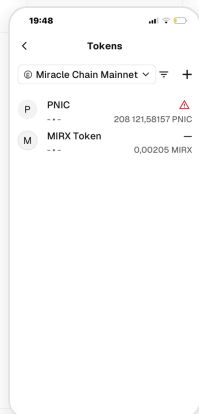

MIRX TOKEN CONTRACT ADDRESS (MIRACLE CHAIN)

0xDA7c25cD2e2EA7Ab6F421D1919BAE13a7d95854e

4 Confirm the import

Tap **"Next"**. Check that **MIRX Token** is shown, then tap **"Import"**.

5 Done!

MIRX now shows in your token list under **Miracle Chain Mainnet**, alongside your PNIC balance.

Good to know

- Always check that the contract address is correct before importing a token — only add addresses you've verified, e.g. from this guide or official Bellator channels.
- The same approach is used to add PNIC manually, if it doesn't already show in your wallet.

Related guides

- **Claim PNIC to MetaMask** — withdraw your PNIC and MIRX rewards.
- **Stake MIRX** — put your MIRX to work for rewards.
