

HOW-TO GUIDE • MOBILE

Add Miracle Chain to MetaMask (mobile)

Last updated: 2026-09-23

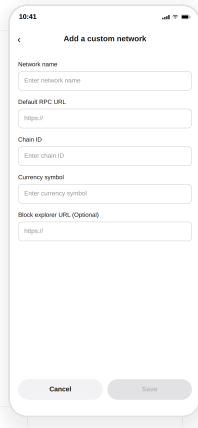

Miracle Chain is not a default network in MetaMask, so it needs to be added manually before you can use PNIC or other assets on the chain. This guide shows you how, step by step.

This guide shows the steps on mobile. Menus, button names and layout may differ slightly between iPhone (iOS) and Android, and between app versions — the principles are the same.

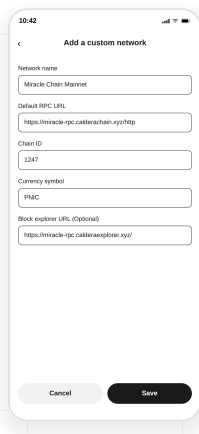

1 Open the network selector

In MetaMask, tap the network selector at the top and go to the **Custom** tab. Then tap **"Add a custom network"** at the bottom of the list.

2 Open the new network form

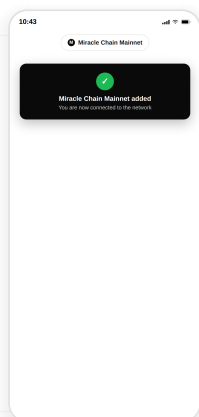

An empty form for adding a custom network appears, with the fields **Network name**, **Default RPC URL**, **Chain ID**, **Currency symbol** and **Block explorer URL**.

3 Enter the details exactly

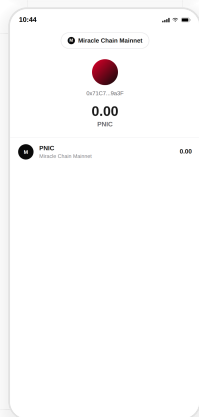

Fill in the following details exactly as shown below. Double-check the **Chain ID** and **RPC URL** in particular before continuing.

Network Name	Miracle Chain Mainnet
RPC URL	https://miracle-rpc.calderachain.xyz/http
Chain ID	1247
Currency Symbol	PNIC
Block Explorer URL	https://miracle-rpc.calderaexplorer.xyz/

4 Save the network

Tap **"Save"**. MetaMask confirms that the network has been added and automatically connects you to Miracle Chain Mainnet.

5 Done!

Miracle Chain Mainnet now shows as your active network at the top, with PNIC as the gas fee/currency. You're ready to receive and send assets on the chain.

Tip: want to see your MIRX balance too? You'll need to add the MIRX token separately — see the "Add MIRX to MetaMask" guide.

Good to know

- Always double-check that the details are correct before saving a new network in your wallet, and only add networks from sources you trust — such as this guide or official Bellator channels.
- Prefer video? Watch the [video guide on YouTube](#), which shows the same steps.
