

HOW-TO GUIDE · MOBILE

Add TURBO to MetaMask (mobile)

Last updated: 2026-09-28

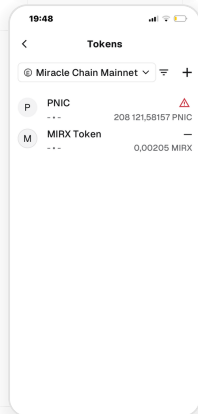

The TURBO token doesn't always show up automatically in MetaMask. This guide shows you how to add it manually so you can see your balance — step by step, on mobile.

This guide shows the steps on mobile. Menus, button names and layout may differ slightly between iPhone (iOS) and Android, and between app versions — the principles are the same.

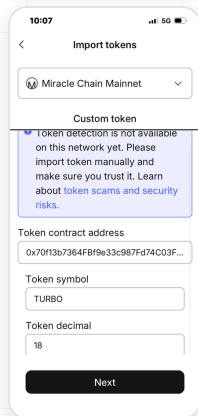

1 Open the network selector

In MetaMask, go to **Networks** and select the **Miracle Chain** network under the **Custom** tab.

2 Add a new token

Tap the **+** icon at the top right of the token list to add a new token.

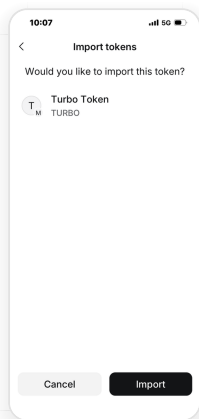

3 Paste the TURBO address

Under **"Token contract address"**, paste the TURBO token's contract address below. The token symbol **TURBO** is filled in automatically.

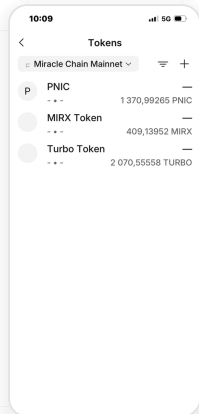

TURBO TOKEN CONTRACT ADDRESS (MIRACLE CHAIN)

0x70f13b7364FBf9e33c987Fd74C03F4fc3587BA15

4 Confirm the import

Tap **"Next"**. Check that **Turbo Token (TURBO)** is shown, then tap **"Import"**.

5 Done! 🙌

TURBO now shows up in your token list under **Miracle Chain Mainnet**, alongside your PNIC and MIRX balances.

Good to know

- Always double-check that the contract address is correct before importing a token — only add addresses you have verified, such as from this guide or official Bellator channels.
- Haven't added the Miracle Chain network to MetaMask yet? Do that first — see "Add Miracle Chain to MetaMask" below.

Related guides

- **Add Miracle Chain to MetaMask** — add the network before importing tokens.
- **Add MIRX to MetaMask** — the same approach for the MIRX token.
