

HOW-TO GUIDE · MOBILE

Buying a Node with cryptocurrency (mobile)

Last updated: 2026-09-18

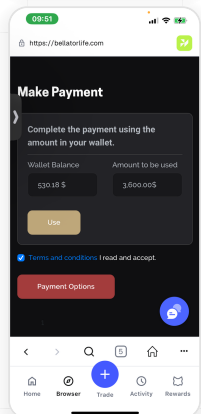

This guide shows how to pay for a Node with cryptocurrency via Miracle Pay — step by step, on mobile.

This guide shows the steps on mobile. Menus, button names and layout may vary slightly between iPhone (iOS) and Android, and between app versions — the principles are still the same.

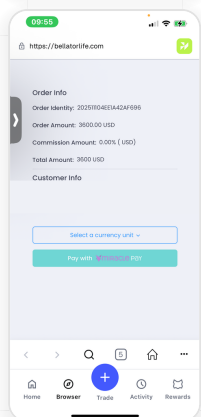

1 Choose a payment option

Once you've chosen a package, you'll reach the payment page. Tick "**Terms and conditions**" and then click "**Payment Options**".

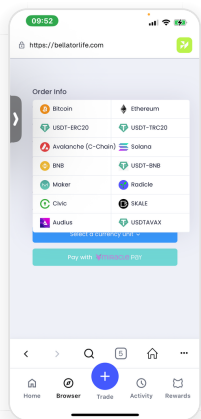

2 Pay with cryptocurrency

Select "**Pay with – CRYPTO**" (Miracle Pay) at the top left.

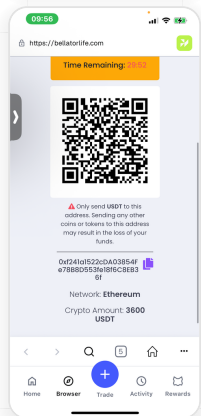

3 Check the order details

Here you can see your order details. Click "**Select a currency unit**" to choose which cryptocurrency you want to pay with.

4 Choose currency and network

You'll see a number of options — choose e.g. **USDT** and the network you want to send on (the same network your wallet/exchange uses). Then click **"Pay with Miracle Pay"**.

5 Pay within 30 minutes

You now have 30 minutes to pay. Copy the address (or scan the QR code) and send the payment from e.g. MetaMask or an exchange.

Important! Only send the selected currency (e.g. USDT) to the address — sending other coins/tokens there can result in permanent loss of funds.

Good to know

- Keep the Bellator page open and don't leave it while you're paying. It's best to open the page on your computer and make the payment itself via mobile.
- When the purchase goes through you'll first get a "success" box, then another one (black), plus a confirmation email once the order is placed. You can also check in Bellator whether the order shows as *successful* or *pending*.
- If you don't manage to pay within 30 minutes, the payment will still go through if you send it — it just takes longer.

PS! MetaMask doesn't need to be connected to complete the purchase itself, but must be connected for you to receive your Node's payouts.

If something doesn't work

- If no success boxes appear, the order shows as *pending*, or no confirmation email arrives — email **customersupport@bellatorlife.com** with: username, email, order ID and date (shown in Bellator), and the transaction ID/hash of the payment (this acts as a receipt).
- Support can then manually match your payment to the correct order ID.
