

HOW-TO GUIDE · MOBILE

Stake MIRX (mobile)

Last updated: 2026-09-18

This guide shows how to stake your MIRX (MetaMask connected) to earn rewards — step by step, on mobile.

This guide shows the steps on mobile. Menus, button names and layout may vary slightly between iPhone (iOS) and Android, and between app versions — the principles are still the same.

1 Open the MIRX page

Go to **mirx.miracledex.net** inside your MetaMask (via the browser/explorer in the app). The first time, select **"Connect wallet"** and connect your MetaMask/Miracle wallet.

2 Choose amount and lock period

Once your wallet is connected, scroll down and choose how much MIRX you want to stake and the number of days (30/60/90). You need a little **PNIC (gas fee)** in your wallet to be able to stake.

3 Confirm

After selecting **"Stake"**, a box appears where you confirm the transaction. A message is shown once it's complete.

4 View your active stake

Scroll down to see your MIRX now being staked, and your active stakes.

5 Track and claim

Scroll down further to see your previous stakes. Here you can also claim your earned rewards — they're deposited directly into your wallet.

How it works

- Staking for 90 days gives double the rewards compared to 30 days. You earn tokens as compensation for "locking" your tokens.
- The size of the rewards also depends on how many are staking in total — a fixed amount is distributed each day among all staked tokens.

If something doesn't work

- Check that you have PNIC in your wallet for the gas fee (the transaction fee) — if not, ask a friend/sponsor to send you some.

Related guides

- **Add MIRX to MetaMask** — if MIRX doesn't already show in your wallet.
- **Stake PNIC** — stake your PNIC too.
