

HOW-TO GUIDE • MOBILE

Stake PNIC (mobile)

Last updated: 2026-09-18

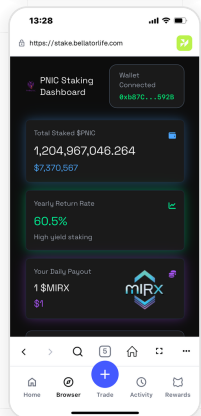

This guide shows how to stake your PNIC to earn MIRX rewards — step by step, on mobile.

This guide shows the steps on mobile. Menus, button names and layout may vary slightly between iPhone (iOS) and Android, and between app versions — the principles are still the same.

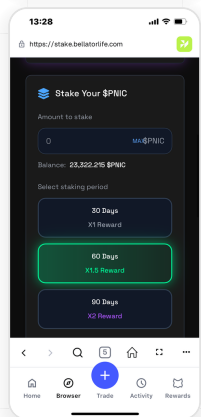

1 Open the staking page

Click **"Stake"** in Bellator, or go directly to **stake.bellatorlife.com**. If the Stake button doesn't work, try going to the page directly. The first time, select **"Connect wallet"** and connect your MetaMask.

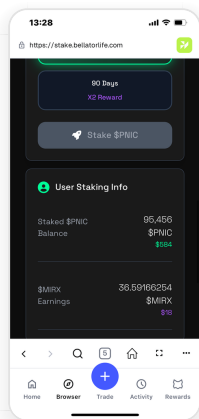

2 Open your staking dashboard

You'll land on your **PNIC Staking Dashboard**. Scroll down.

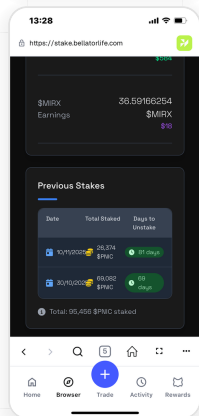

3 Choose amount and period

Here you can see how much PNIC you can stake (matching what's in your MetaMask). Choose the number of days — **30, 60 or 90**. 90 days gives the highest rewards (X2 Reward).

4 Confirm stake

Click "**Stake \$PNIC**". Scrolling down shows how much you're already staking and how much MIRX you've earned so far.

5 Track your stakes

Scroll down further to see your different stakes and when they expire. Once a stake expires, you can re-stake it.

Currently (Sep '26): APR is around 500% per year.

If something doesn't work

- Check that you have PNIC in your wallet for the gas fee (the transaction fee) — if not, ask your sponsor/contact person to send you some.
